This document and the information contained herein is the proprietary information of PIP; it may not be reproduced, amended, or used for any other purpose, without the prior written permission of PIP. This document is distributed by Pantheon, a firm that is authorised and regulated by the Financial Conduct Authority ("FCA") in the United Kingdom. The information and any views contained in this document are provided for general information only. Nothing in this document constitutes an offer, recommendation, invitation, inducement or solicitation to invest in PIP. Nothing contained in this document is intended to constitute legal, tax, securities or investment advice. You should remember that the value of an investment in PIP, and any income from it, may go down as well as up, and is not guaranteed, and investors may not get back the amount of money invested. In addition, past performance is not necessarily indicative of future results. You should note that investments in private equity may be illiquid and may involve a high degree of risk, including potential loss of principal invested.

In addition, most of PIP's investments are in funds whose principal investment focus is outside the UK. Movements in exchange rates between sterling and other currencies therefore effects the value of PIP's investments. Further, the market price of PIP's shares may reflect a discount in the net asset value of PIP's shares, and this discount may increase or reduce due to market factors which are unrelated to PIP's NAV or performance. Losses may be multiplied since PIP invests in a range of private equity strategies including buyouts that commonly use gearing. PIP's investment valuation method is reliant on financial information provided by underlying funds and companies into which it invests. Valuation methods used by those funds and companies may be inconsistent.
